~ADORN YOUR STORY~

Primary Logo Clear Space

The clear space around the Annica Creations primary logo ensures visual clarity, balance, and brand integrity. This space, defined as ‘x’, is equal to the height of the letter "I" in the Annica logotype. This measurement acts as a protective zone, ensuring that no other elements interfere with the logo’s legibility and elegance.

Maintaining this spacing is crucial for brand consistency, especially across different applications such as packaging, digital media, and marketing materials. The clear space should always be respected, ensuring that the logo remains distinct, impactful, and visually harmonious, allowing it to make a sophisticated statement in all placements.

Primary Logo without the tagline

The primary logo without the tagline ensures versatility and adaptability, making it ideal for smaller spaces or minimalistic branding. By removing the tagline, the logo remains clean and legible, maintaining its elegance across different applications.

This version is best used in emailers, website footers, app icons, and subtle branding on packaging. It provides flexibility while still maintaining strong brand recognition, ensuring Annica Creations' identity remains clear, refined, and sophisticated across all platforms and materials.

Clear Space Primary Logo without the tagline

The clear space around the Annica Creations primary logo ensures visual balance, clarity, and prominence. The space is defined as ‘x’, which is equal to the height of the letter "I" in the Annica logotype. Secondary Logo

The secondary logo for Annica Creations—without the mnemonic or tagline—offers simplicity, flexibility, and adaptability across various brand touchpoints. This version is ideal for subtle branding, ensuring easy readability in compact spaces while maintaining elegance and recognition.

It is best used in website footers, email signatures, social media posts, watermarking, brand collateral, invoices, and minimalistic packaging. The absence of the symbol and tagline allows for a clean, sophisticated look, making it perfect for instances where a refined yet distinct brand presence is required without overwhelming the design.

Secondary Logo Clear Space

The clear space around the Annica Creations secondary logo ensures legibility, balance, and brand consistency. The space is defined as ‘x’, which is equal to the height of the letter "I" in the Annica logotype. This measurement creates a protective boundary, preventing visual clutter and ensuring that no other design elements interfere with the brand’s elegance.

Vertical Logo 0.1

The vertical logo provides a compact and balanced alternative to the primary logo, making it ideal for spaces where a horizontal format may not fit well.

The vertical logo (Version 0.1) can also be used without the tagline, ensuring adaptability for minimalist branding or small-scale applications like jewelry engravings, business cards, and product stamps. This variation ensures that Annica Creations remains elegant, refined, and highly recognizable across different platforms.

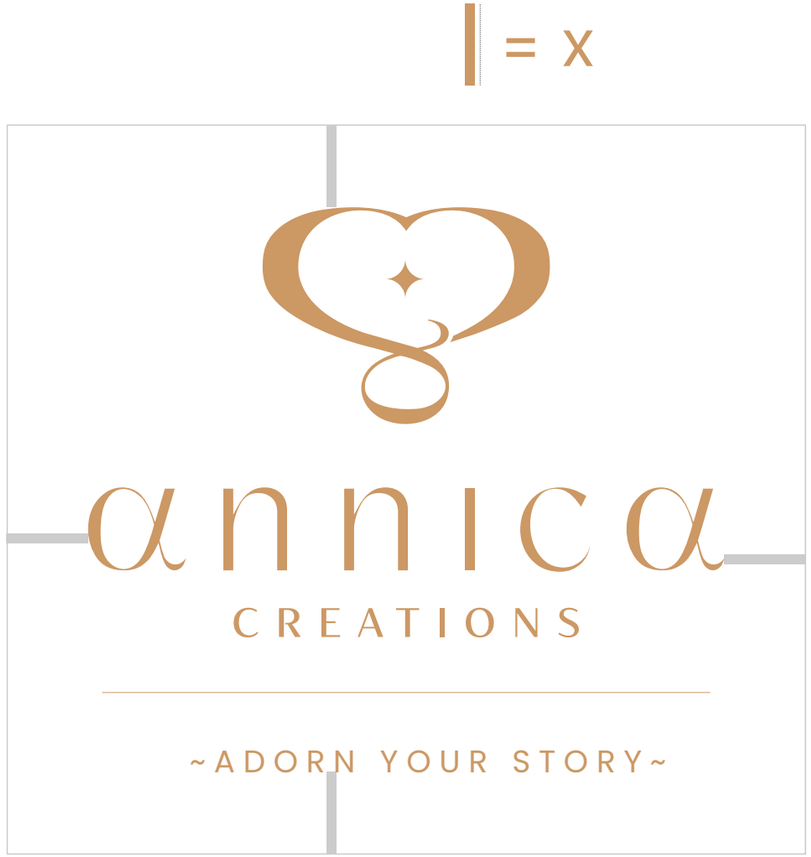
The space is defined as ‘x’, which is equal to the height of the letter "I" in the Annica logotype. The same minimum spacing (‘x’) must be maintained even when the logo is used without the tagline, ensuring consistency and brand integrity. This standard guarantees that the logo remains refined, professional, and impactful in all branding materials.



Vertical Logo 0.2

The Vertical Logo 0.2 emphasizes the mnemonic/logo symbol, making it the focal point, while the logotype is smaller compared to Vertical Logo 0.1. This variation is ideal for branding applications where the symbol needs to stand out more prominently, such as luxury packaging, digital icons, merchandise, jewelry engravings, and signage.

This version enhances brand recognition and recall, especially in smaller spaces or minimalistic designs where the intricate details of the symbol convey the brand essence without relying heavily on text. It ensures that Annica Creations remains visually impactful and memorable across various platforms.

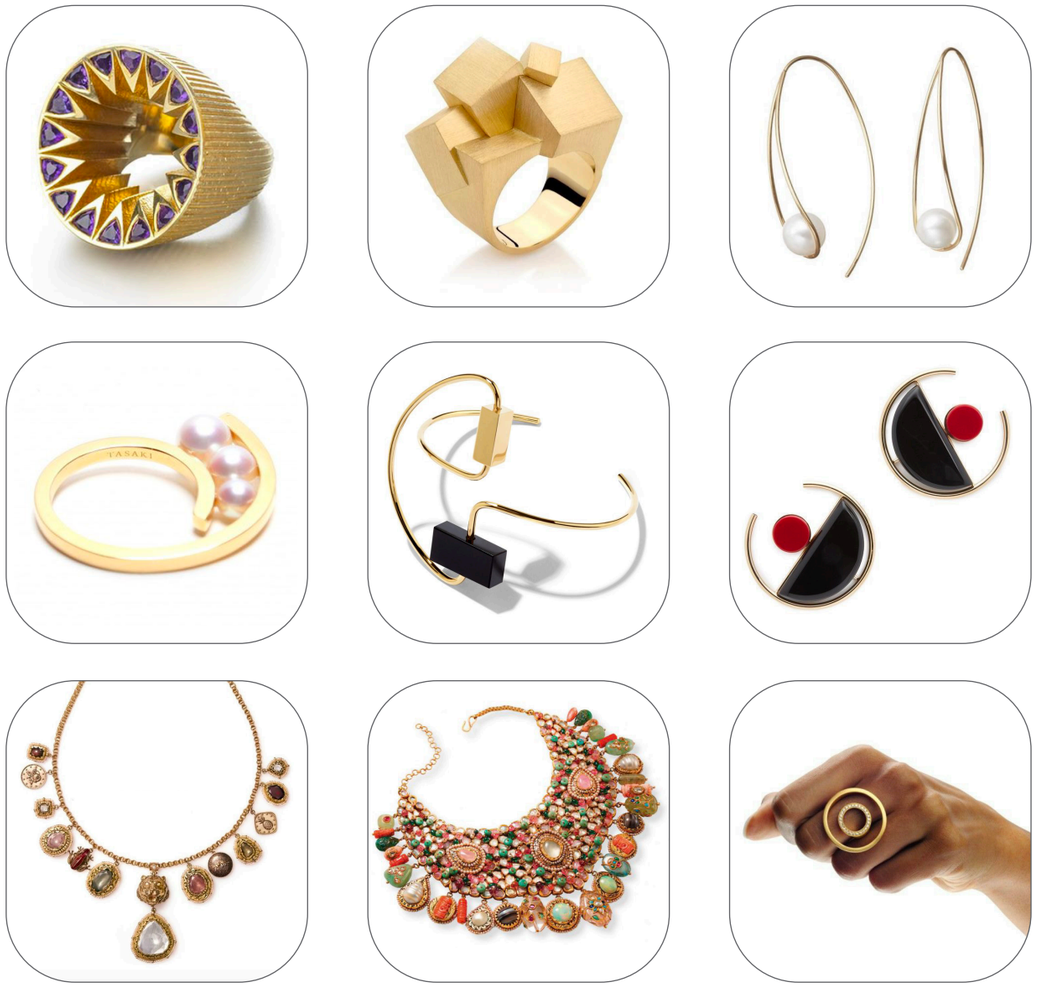
PHOTOGRAPHY STYLE

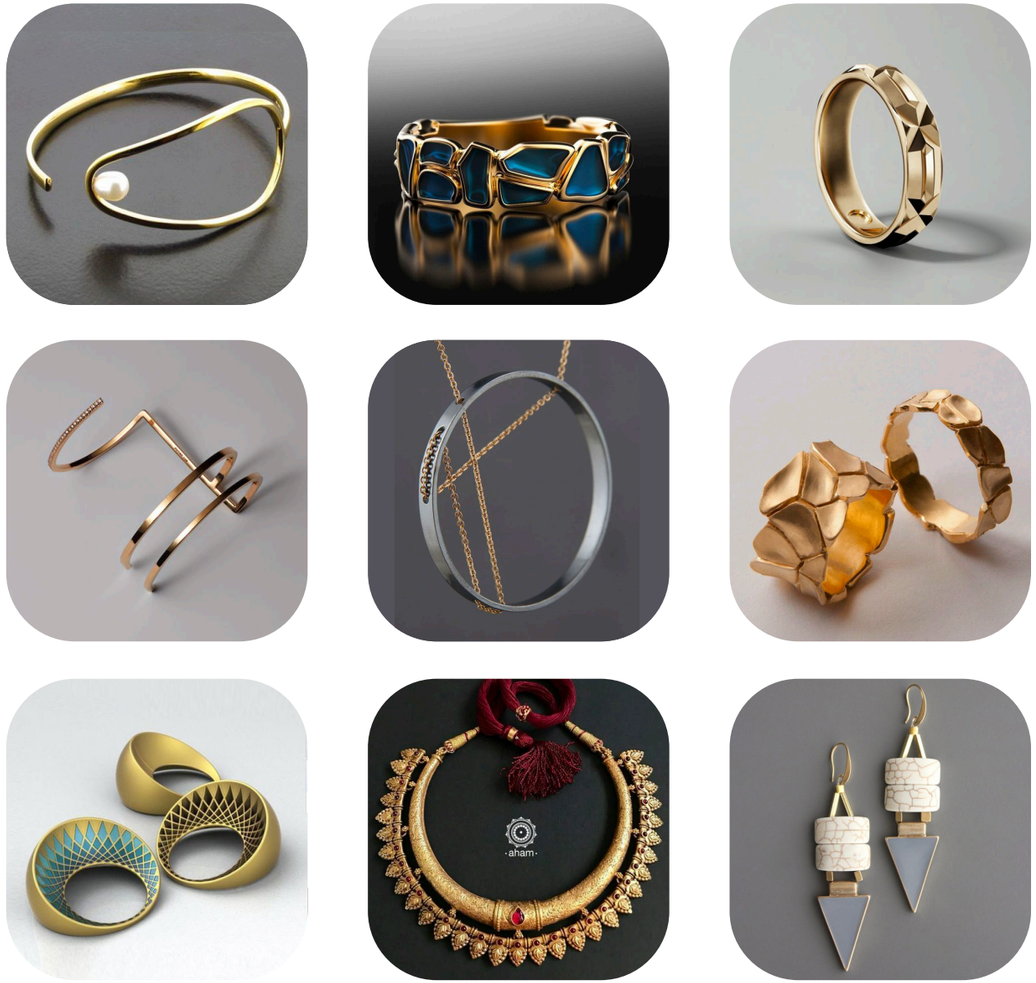
Product Photography Style Against White

Annica Creations' product photography against white ensures a crisp, clean, and timeless presentation, allowing the jewelry's design, color, and intricate details to take full focus. The stark white background creates a sense of lightness and sophistication, making the gold, gemstones, and textures appear more vibrant. Shadows should be soft and natural, enhancing depth without overpowering the design. The styling should be minimal, with well-balanced compositions and sharp clarity. This style is ideal for e-commerce, catalogues, and branding, presenting each piece in its purest form with a refined and modern aesthetic.



Product Photography Style Against Greys

Annica Creations' product photography against greys exudes a contemporary, refined aesthetic that enhances the jewelry's form and craftsmanship. The neutral grey backdrop provides a sophisticated contrast, allowing gold, gemstones, and intricate textures to stand out effortlessly. Lighting should be soft yet directional, casting subtle shadows to create depth and drama. Matte and gradient grey tones can be used to add visual interest while maintaining a clean, modern appeal. The focus should be on precision and clarity, with sharp macro shots and dynamic compositions that highlight structure, reflection, and unique design details.



Product Photography Style With Model

Annica Creations' model photography is a seamless blend of elegance, boldness, and sophistication. Models should be styled minimally, with sleek attire in neutral or monochrome tones to let the jewelry take center stage. Poses should be poised yet natural, with soft hand gestures, elongated necklines, and confident angles. Lighting should be soft yet directional, creating subtle shadows that highlight the jewelry's texture and form. Close-ups and mid-shots should focus on the interplay of jewelry with skin, movement, and personality, evoking a sense of luxury and individuality.

Product Photography Style - Creative Shots

Annica Creations' photography embodies elegance, minimalism, and artistic storytelling. Each shot should highlight the intricate details, textures, and craftsmanship of the jewelry, using soft, natural lighting to enhance the colour of the metals and the stones in it. Backgrounds should be clean yet rich in texture—marble, fabric, or muted pastels—to create a refined aesthetic. A mix of close-up macro shots, dynamic angles, and creative shadows will add depth and emotion. Play with light and reflections subtly to evoke sophistication while maintaining a modern yet timeless feel.
